

AT 303 - PREMIUM POLYMER POLISH

TECHNICAL DATA SHEET

AT 303 - Premium Polymer Polish is an ultra high performing polish that protects almost any painted surface. It applies easily to virtually all painted, powder coated, plastic and polished surfaces to create a beautiful and long lasting shine. It may be applied and hand buffed in direct sunlight. AT 303 lasts longer than most wax products and a single treatment will last for a season in most conditions. AT 303 is often used on automobiles but it is also very effective on boats, tractors, airplanes, outdoor equipment and metal building facades.

Proudly manufactured in the USA.

Key Performance Properties

- Creates a high gloss, long lasting shine on almost any painted surface.
- Provides long lasting UV protection.
- Preserves the true color of quality painted surfaces.
- Removes road tar, bugs, and similar contaminants during application.
- Easy to apply by hand. Rub on. Let dry. Buff off with clean, soft towel.
- May be applied in direct sunlight.
- Environmentally friendly.
- Approved for use in and around US waterways (if used as directed).
- RoHS and REACH compliant.

Common Applications

- Automobiles
- Boats
- Trains
- Airplanes
- Tractors
- Outdoor equipment
- Metal building facades

Supplemental Information

AT 303 is a recommended protective top coat for surfaces treated with AT 202 - Finish Restorer.
