

AT 4500 – ALPHAGRIP COATING SERIES

TECHNICAL DATA SHEET

AT-4500 Series coatings are specifically formulated to create non-slip traction on a wide variety of surfaces. It creates a tough “rubberized” feel that significantly improves traction and footing, especially in wet conditions. AT-4500 Series Coatings are environmentally friendly and may be used in a wide variety of settings. The coatings are easy to apply, durable and long lasting. AT-4500 Series is available in a range of colors and textures for a wide range of applications.

Proudly manufactured in the USA.

Technical Data

Color	Varies
Viscosity	90-110 sec. #2 Zahn
Percent of Solids (Primers)	18%
Percent of Solids (Top Coats)	66%
Odor (liquid)	Slight Ammonia
V.O.C	None
Halogens	None
RoHS	Compliant
REACH	Compliant

Key Performance Properties

- Creates non-slip traction surface.
- Applicable to a wide range of surfaces including metal, wood, concrete and fiberglass.
- Available in a wide variety of colors (including clear).
- Tough and durable for long lasting performance.
- Available in both a smooth finish and a variety of textures.
- Creates hydrophobic surface for long lasting protection.
- Suitable for both consumer and industrial applications.
- May be applied by roller or spray.
- Protects surfaces from weathering.
- Environmentally friendly.
- Easy application. Just mix, wipe and rinse.
- RoHS compliant.
- REACH compliant.
