

# (AT-401-AM) AM L&V PROTECT

Part of the **AlphaSAFE** Antimicrobial Line

## APPLICATION INSTRUCTIONS

### 1. PRODUCT DESCRIPTION

AM L&V PROTECT restores and protects leather and vinyl surfaces. It makes old vinyl and leather surfaces look like new. AM L&V PROTECT is a two-in-one product that both cleans and protects almost any leather or vinyl surface. It leaves leather and vinyl soft, supple, flexible and protected from UV damage. No greasy or slippery residue. Perfect for automobiles, boats, furniture, leather accessories and boots.

### 2. APPLICATION

*NOTE: As with any new material, always test application and finished properties on a low value test article or panel before working on valuable surfaces.*

- Clean surface of any dirt or grime.
- Shake bottle well.
- Apply modest amount of product to a soft terry-cloth towel.
- Use a circular motion with moderate pressure to work product into the surface evenly.
- Let the coating absorb into the surface.
- As the coating is absorbed, it will continue to soften and protect the surface from weathering and UV damage.
- After a few minutes, if there is more product on an area than will absorb into the surface, just wipe off any excess coating or spread the excess amount over a larger area.
- Once product is absorbed into the surface, gently buff with a clean dry cloth to achieve a beautiful luster.
- New leather surfaces generally require one coat. Older, hardened leather or vinyl surfaces may require 2-3 coats. Let each application soak in and penetrate the material before applying the next coat.
- Re-apply as often as desired to keep leather and vinyl surfaces in premium condition.
- Note that product will not repair cracks in leather or vinyl surfaces. Product will soften the area around cracks and thereby help to reduce future cracking.
- Product may not always remove stubborn chemical stains.

### 3. STORAGE STABILITY& SHELF LIFE

- The shelf life is one year when stored in the original, unopened container. Store containers in a well-ventilated and covered area away from extreme heat and moisture. Contact your ALPHATEK representative if you have any questions about the products or its uses.

### 4. SAFETY

Refer to the Safety Data Sheet for this product prior to use.
